

SCRUM Meeting 1 Minutes (11/10/2025)

Team 71 focused on wrapping up Sprint 1 and planning for Sprint 2. The team began by reviewing accomplishments since the last meeting, noting the completion of major features such as the Customer and Manager Views, Login/Logout functionality, and the Menu Board. All assigned Sprint 1 tasks, Sprint 1 Written Materials, GitHub Release, and Demo Video were successfully completed. The discussion then shifted toward organizing Sprint 2, where the team delegated new tasks and updated Jira accordingly. Responsibilities were clearly divided: Jayani and Claire would handle the backend for the Customer Kiosk View, Anna would develop the frontend for the Self-Service UI and work on the User Authentication API, and Sarah would continue working on the Menu Board while implementing the Weather Service API. Vaidehi was assigned to the Kitchen View, Live Order Tracking, Text-to-Speech API Approval, and preparation of Sprint 2 Written Materials, GitHub Release, Demo Video, and Mid-Project Slides. Haajirah was tasked with integrating the Translation API, while Claire would work on the Text-to-Speech API integration. The team concluded the meeting with a clear plan for the upcoming sprint and a commitment to maintaining organized progress tracking in Jira.

SCRUM Meeting 2 Minutes (11/14/2025)

During the SCRUM Meeting 2 for Project 3 on 11/14/2025, the team reviewed progress on Sprint 2 and updated Jira with current task statuses, story points, and estimates. The group discussed key accomplishments since the previous meeting, including the successful release, demo, and deployment of the Sprint 1 MVP, as well as completion of the basic Manager and Cashier Views. The team finalized Sprint 2 task delegation, confirming that all initial setup tasks were completed. Looking ahead, members outlined plans to advance the Sprint 2 MVP by integrating the Translation API and other external APIs, developing the Kitchen View and live order tracking features, and ensuring secure webpages. Finally, Specific task assignments were set. Claire will work on securing the webpages and text-to-speech, Haajirah on the Translation API, Vaidehi on the Kitchen View and Live Order Tracking, Anna on OAuth, Jayani on Cashier-to-Customer flow and modifications, and Sarah on the menu and Weather API Integration.

SCRUM Meeting 3 Minutes (11/19/2025)

During SCRUM Meeting 3, the team reviewed individual user study feedback and discussed overall progress on Sprint 2 tasks. Since the previous meeting, several key accomplishments were completed, including fixing the project folder structure, implementing text-to-speech, completing the individual user studies, and beginning the English-Spanish translation feature. Team members also reported completed tasks with Claire successfully implementing the text-to-speech API and securing the webpages, while Sarah finalized the menu interface.

The team then outlined priorities for the remainder of Sprint 2. Before the next meeting, members plan to finish Google OAuth integration, complete the weather API functionality, implement the cashier, cart, and modification features, and build out the kitchen and live order tracking view. Additional goals include finalizing the translation API and preparing the mid-project presentation. Task assignments were confirmed with Anna leading the Google OAuth, Sarah integrating the Weather API, Vaidehi will develop the kitchen and live order

tracking view, Jayani will handle the cashier, cart, and modification components, and Haajirah will complete the translation API. Vaidehi will also work on the mid-project presentation, while all team members will contribute to addressing and implementing user study feedback.
